  - a propagation path derivation unit operable to derive propagation path data from information received by a driver's vehicle, using position data of another vehicle from which the information is propagated;
  - a data adding unit is operable to add the travel route data to the received information in a case that a number of the relay in the received information is less than the threshold value.
  - a determination unit operable to determine whether or not the propagation path data matches the road shape data, and to generate match information in a case that the propagation path data matches the road shape data; and
